MINOR PROJECT

AYURVEDA PHARMA GUIDE

ABSTRACT:

Our Ayurvedic app was designed to prioritize people's health during the time when many of us lived indoors. With the announcement of a nationwide lockdown due to the COVID-19 pandemic, people were unable to access vaccines and feared contracting the virus if they left their homes. To address this concern, we provided kitchen medicine solutions rooted in Ayurveda, using common spices like clove and cardamom, which were historically used to treat ailments in the absence of advanced hospitals. Our app offered instructional videos and information to help users prepare their own medication without having to venture outside.

IMPLEMENTATION

HCI PROJECT:MODIFYING COLLEGE ERP INTERFACE

Problem Statement

To design, develop and build a highly available, scalable, and fault-tolerant web Prototype applying HCI principles

Project Objective:

- To schedule the jury process for all the disciplines.

- To maintain and store the student's information.

- To maintain and store the course registered by the students. To maintain and store the Jury marks and feedback.

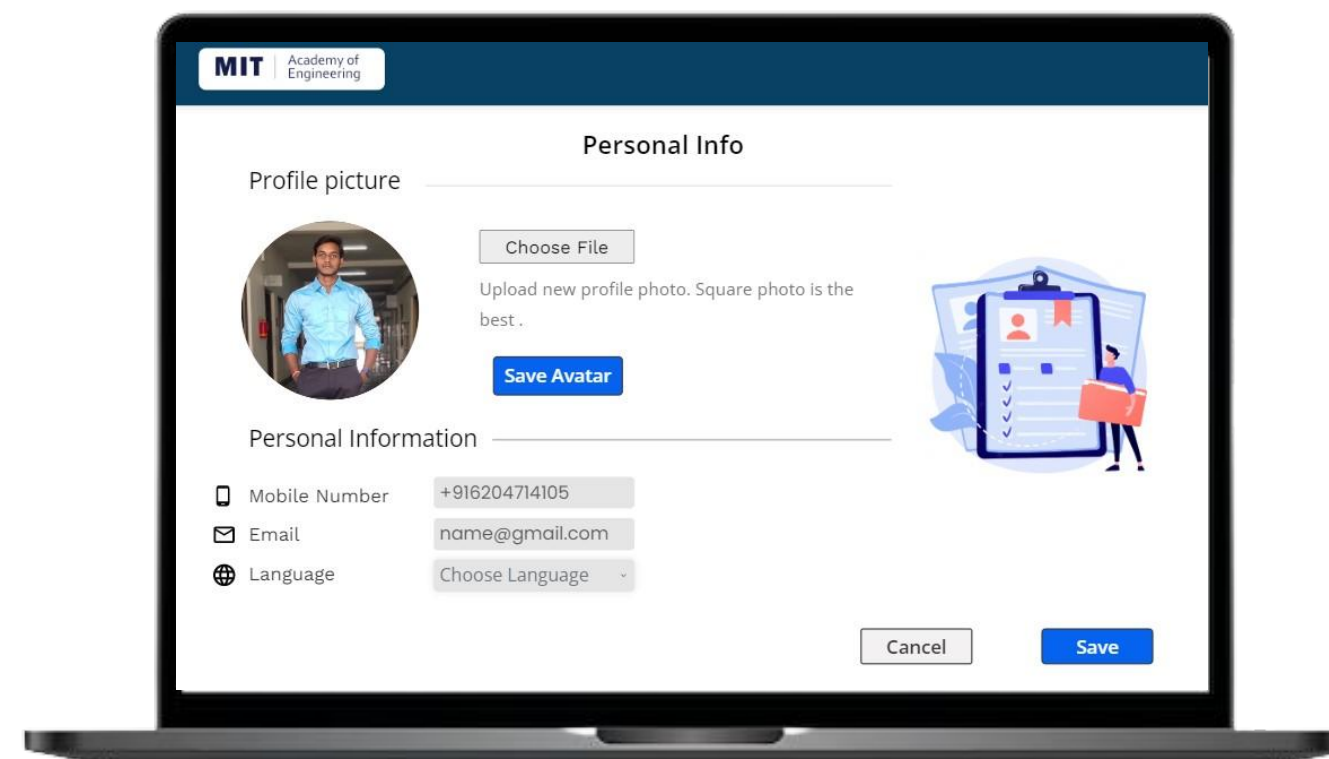

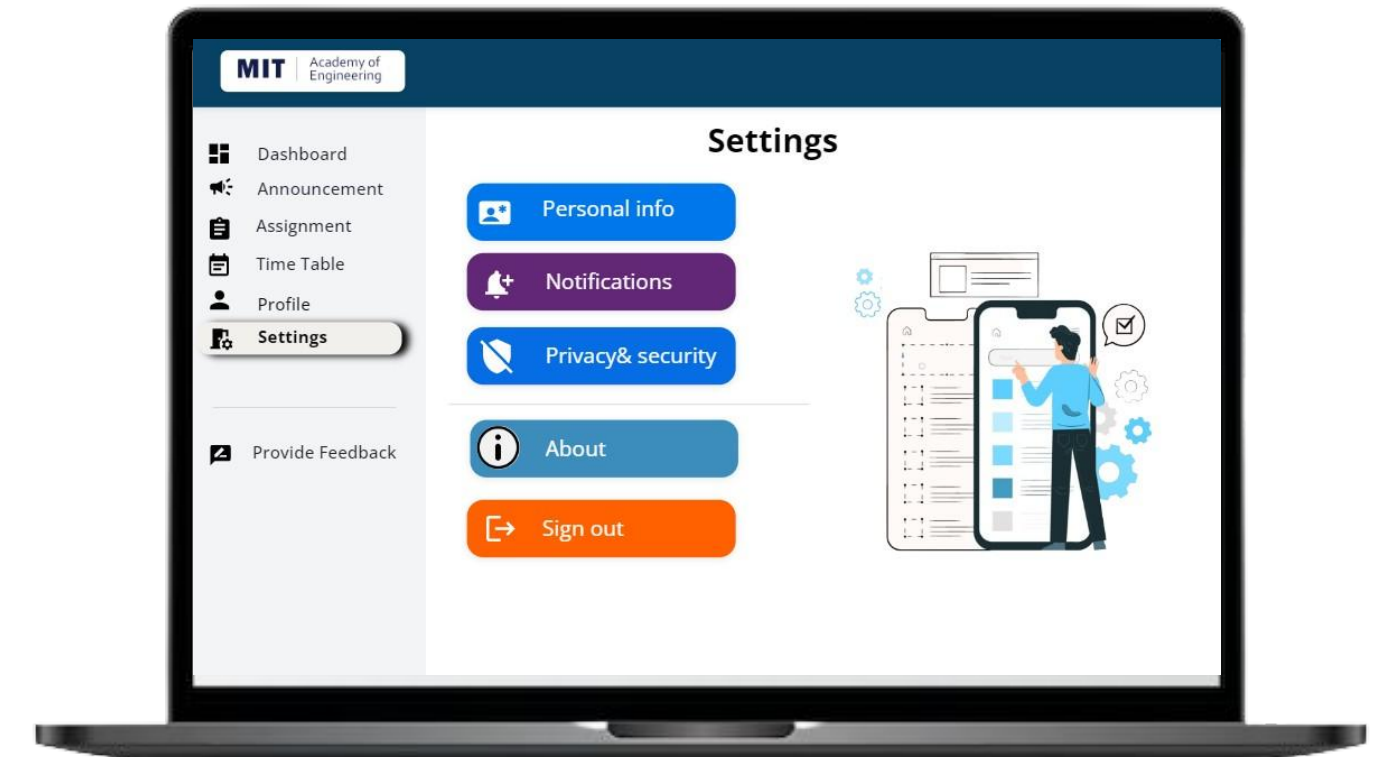

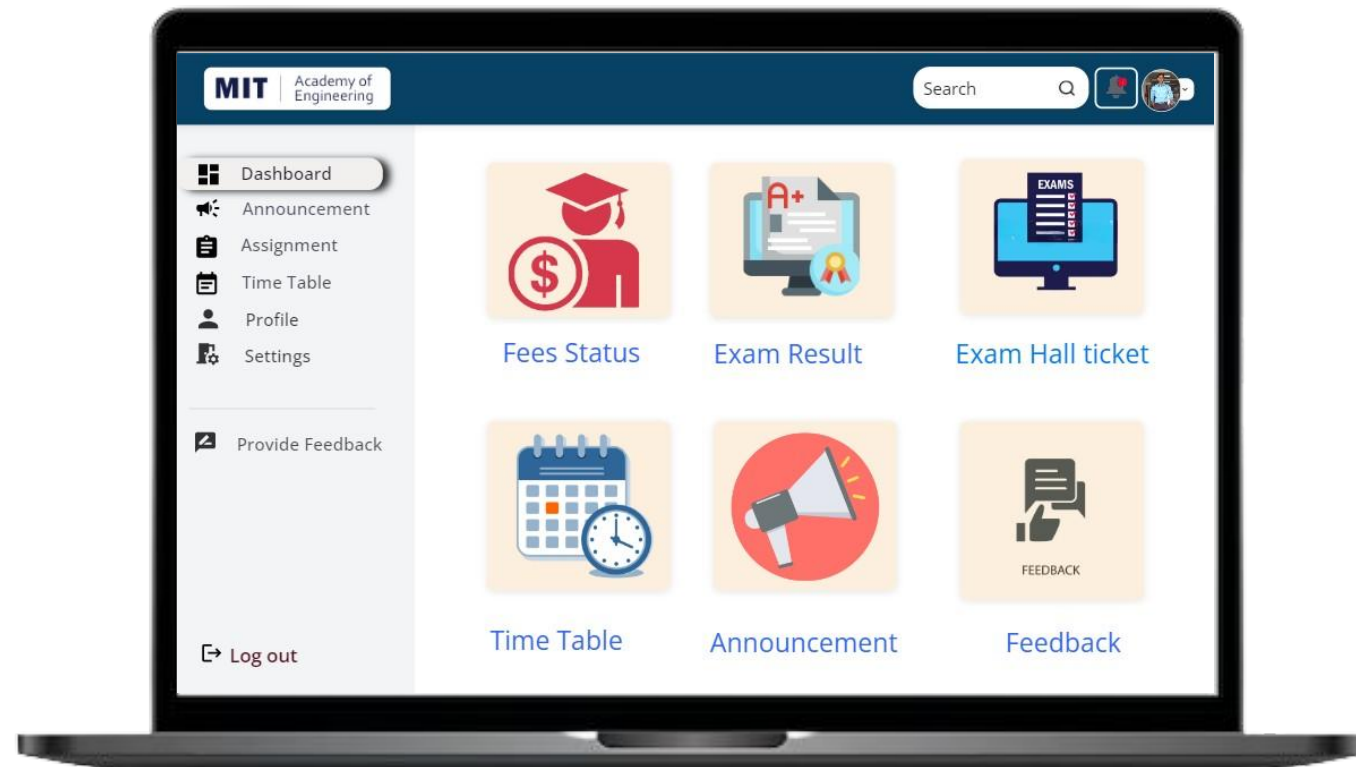

- To maintain and store the jury rubrics for each course.

- To publish and transfer the results to the exam office in the required format.

Scope of the Project:

This project will initially start with understanding and identifying the problem faced by the user of The College ERP system. Then after understanding the problems, the project will move to a prototype. The prototype will include the wireframes and complete flow of the web app. Once the prototyping is done, then the focus will shift to the actual implementation of the platform. In the end, all the data will be centralized and displayed on a web-based dashboard for both the admin and user sides.

Placement Update

excited to announce that several top companies have shown interest in recruiting students from our college for their open positions. Our placement cell has been working tirelessly to ensure that you have the best

MAJOR PROJECT - BLOCKCHAIN ENCRYPTION USING BIOMETRIC AUTHENTICATION

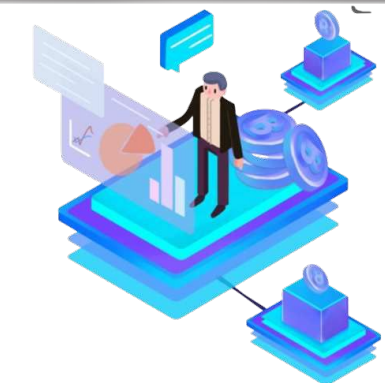

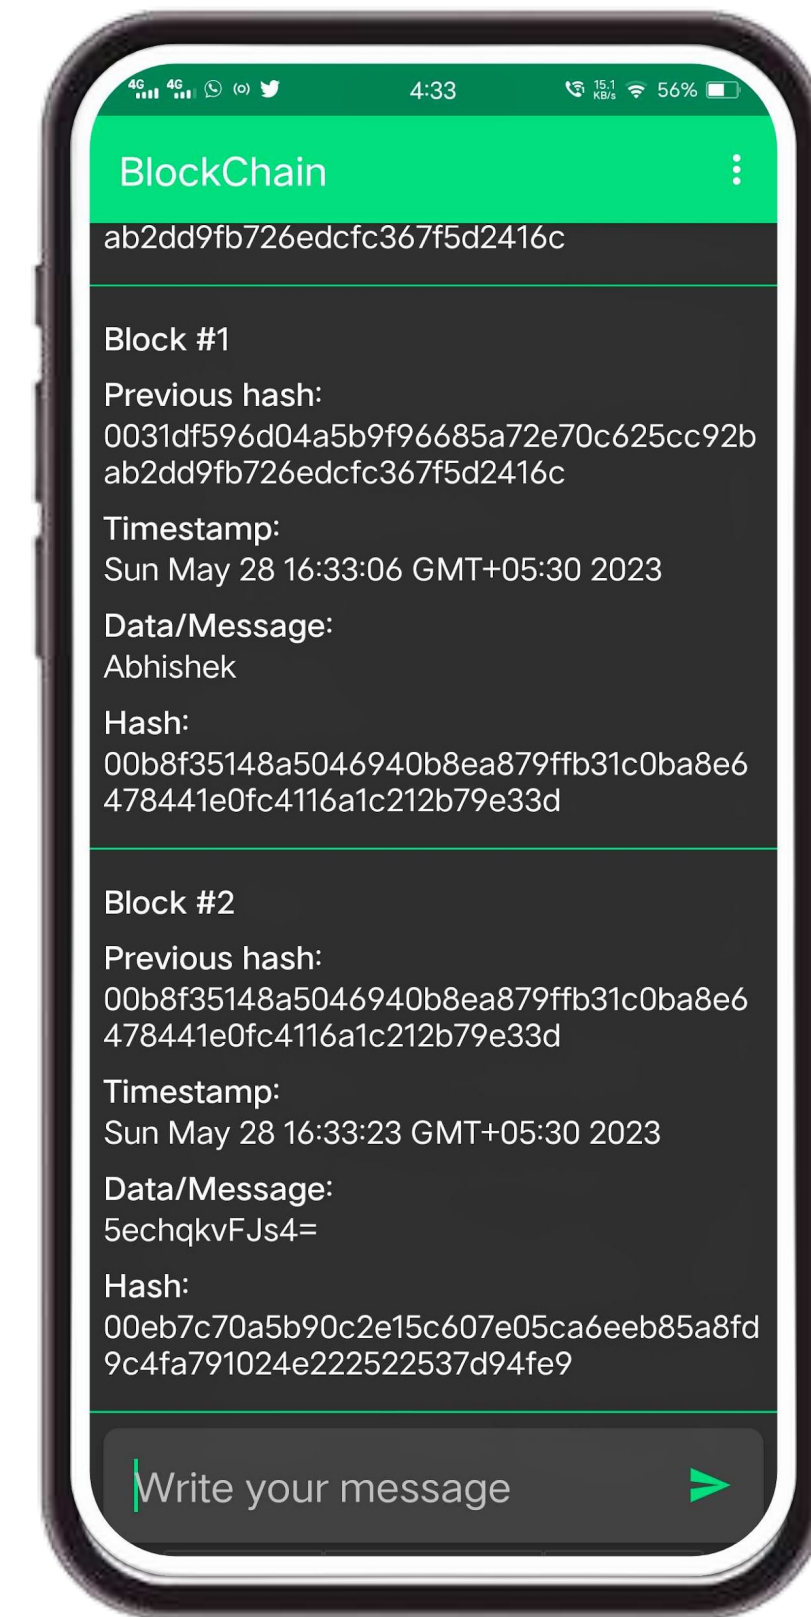

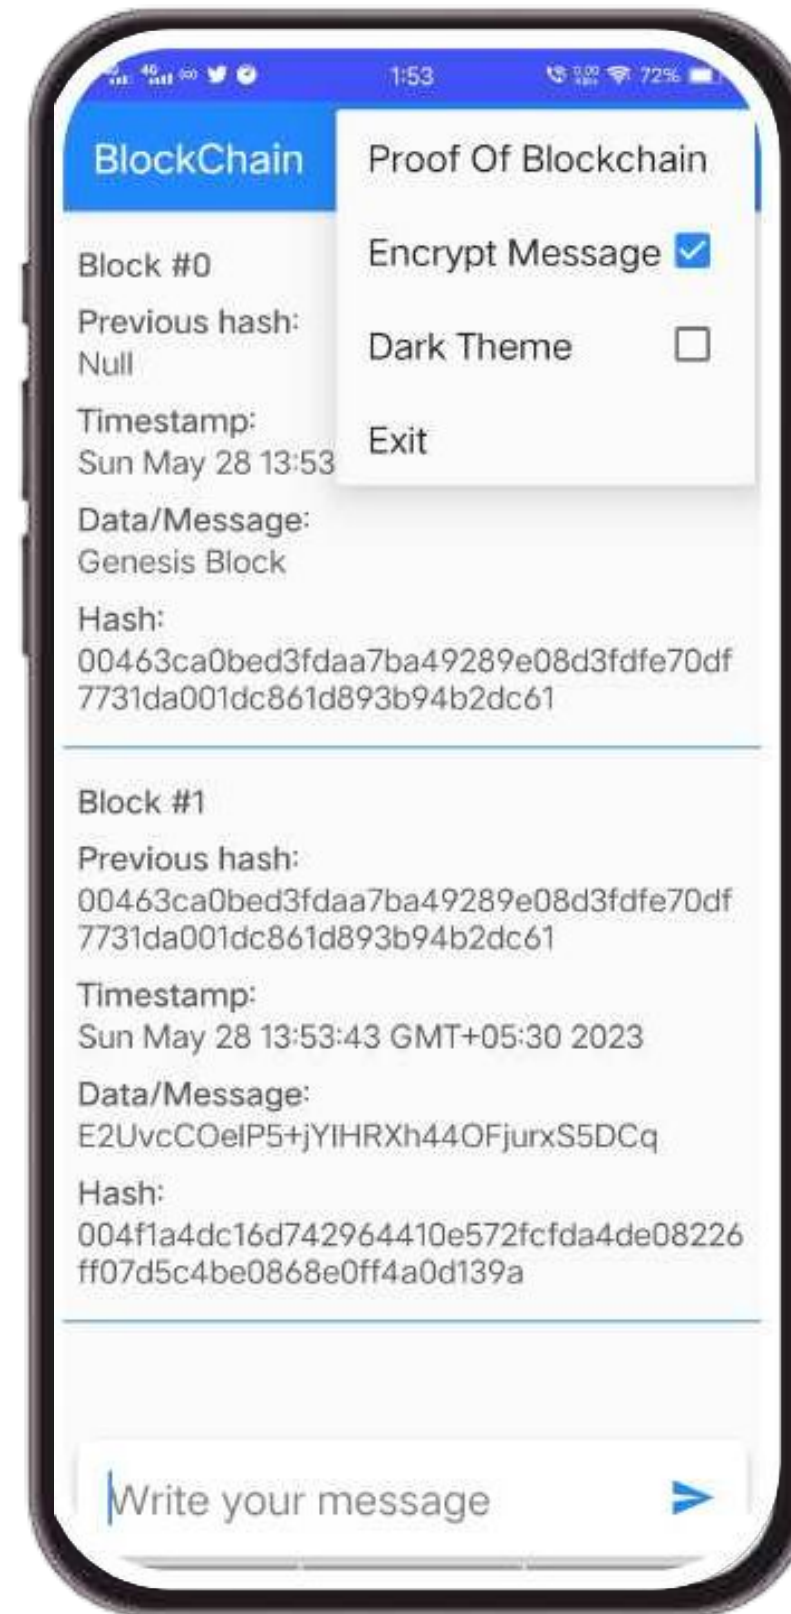

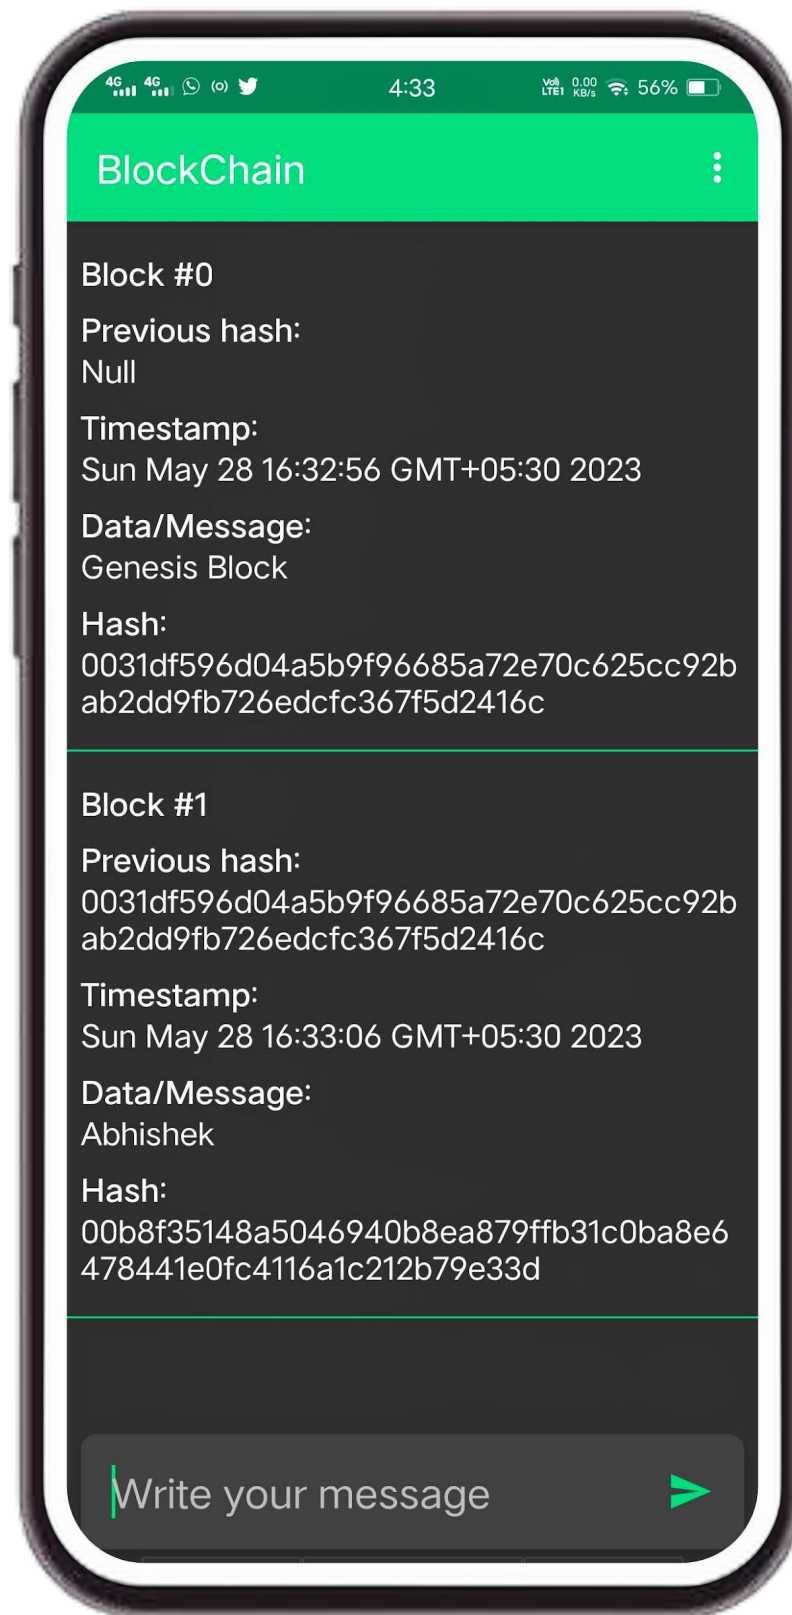

- **Objective** - The cloud storage, like the Third Party Auditor (TPA), is centralized, and the integrity is verified by requesting CSP, resulting in a high computation power. Many systems especially in the banking sectors having biometric enabled their server got compromised what if we could integrate biometric along with blockchain having a decentralised system and increasing the layer of security
- **Proposed Solution** The system is comprised of two or three layers the first one is authentication layer where minutiae based algorithm is used as biometric authentication If the user is authentic then only he /she can able to login To verify the user authentication we are using minutiae based algorithm which is already their in the users mobile User will be given two option either sent as plain message or as encrypted message

MY PROJECT GUIDE

MRS NEHA HAJARE

Our Mentor Neha Hajare , have been associated with academia for more than 11 years helped as a mentor in project based on our own work carried out during the course . Her experience, level of Expertise and guidance has helped a lot in the nurturement and development of our project

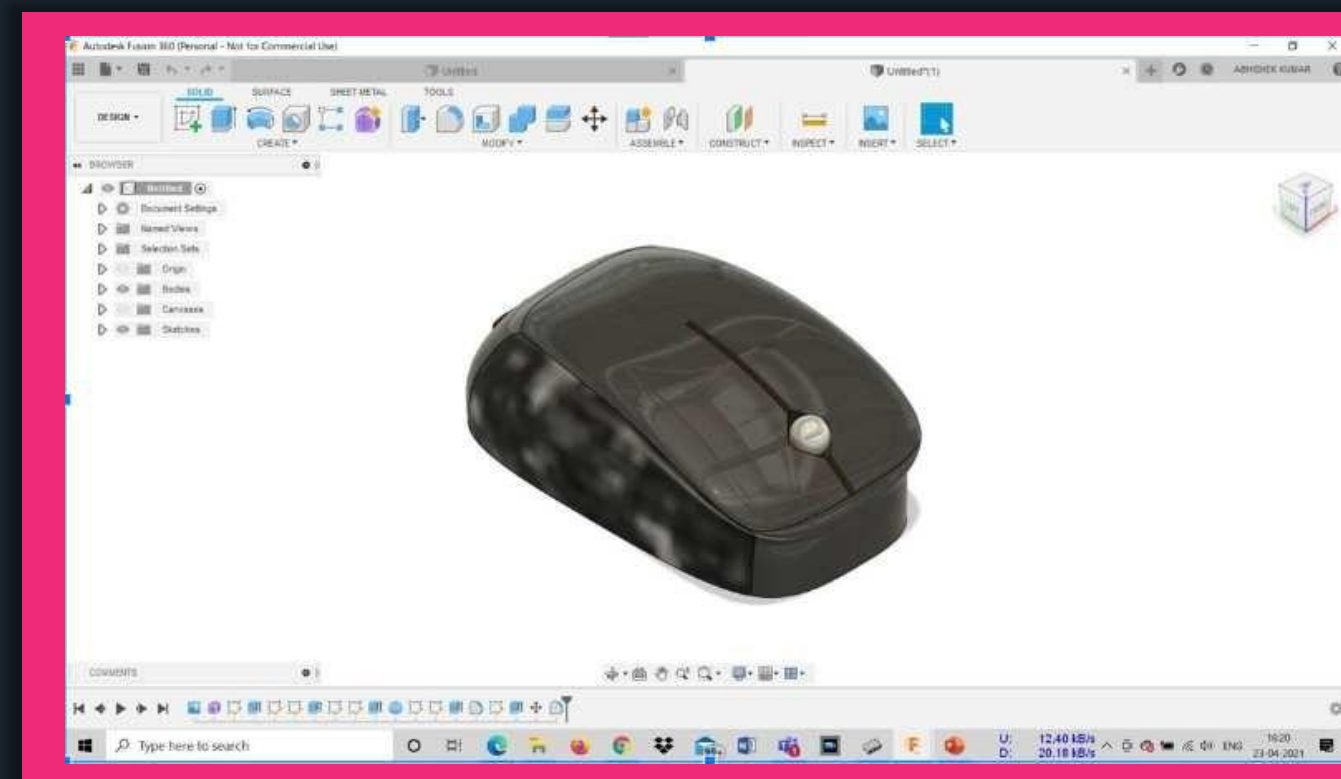

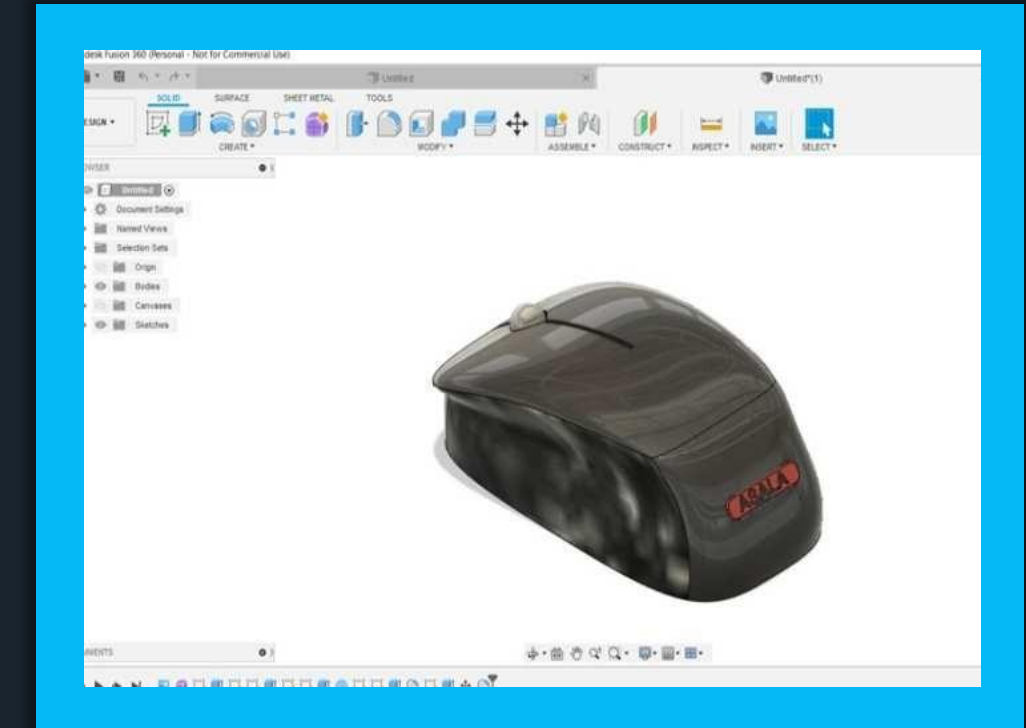

MECHANICAL PROTOTYPING

What We've Done

About Project

Ergonomic Mouse - Prototyping of ergonomic mouse with varied features included as compared to normal mouse

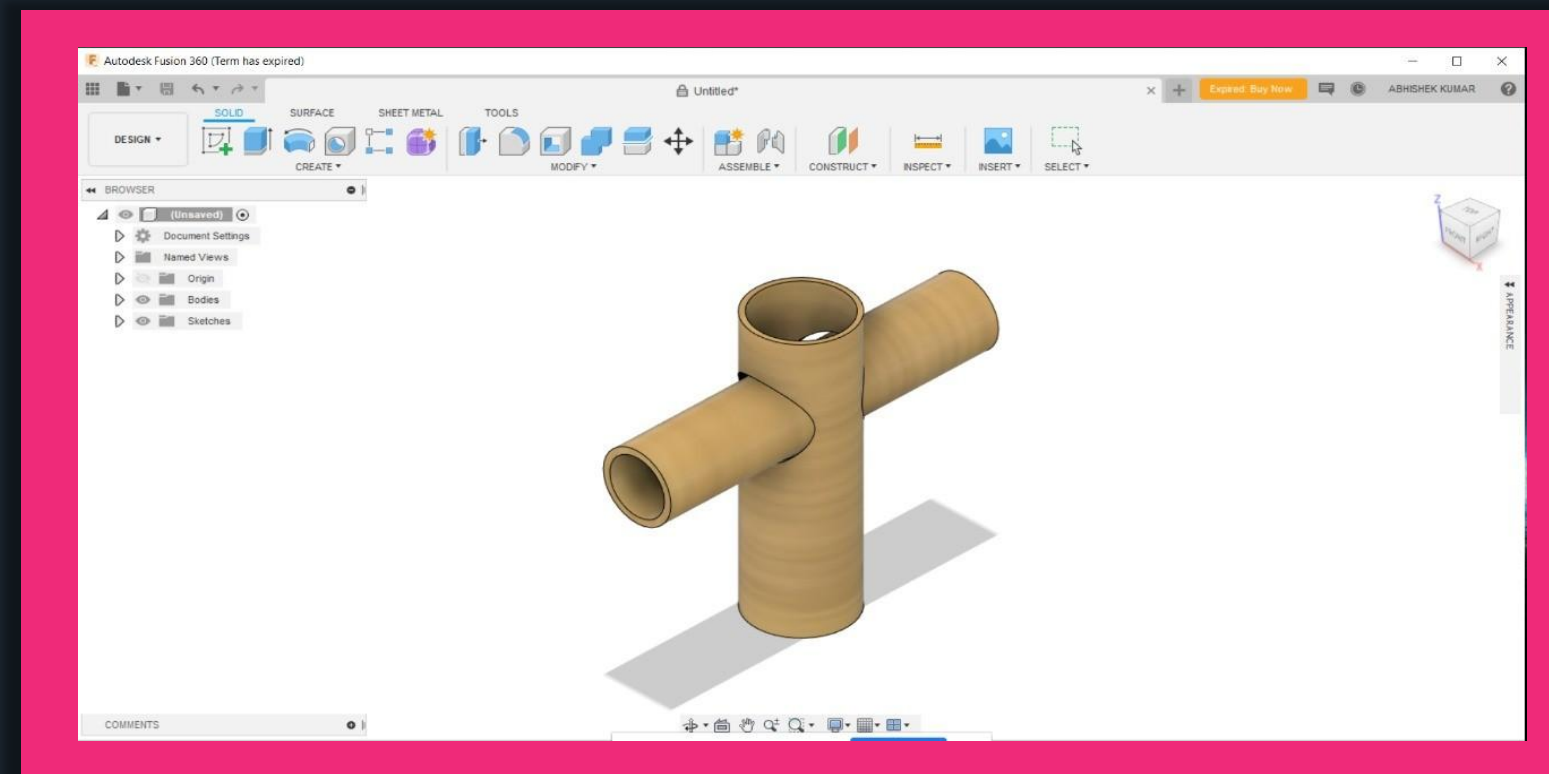

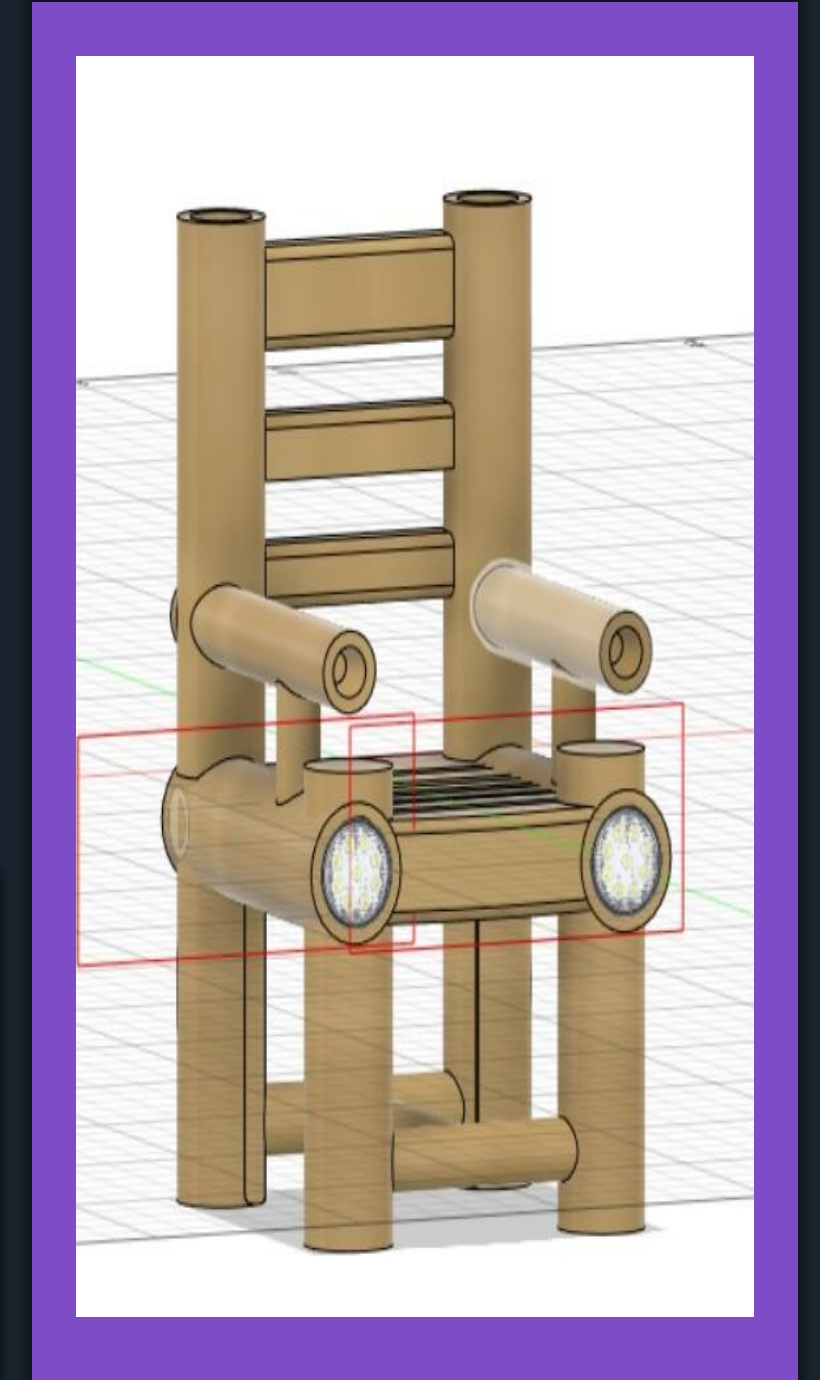

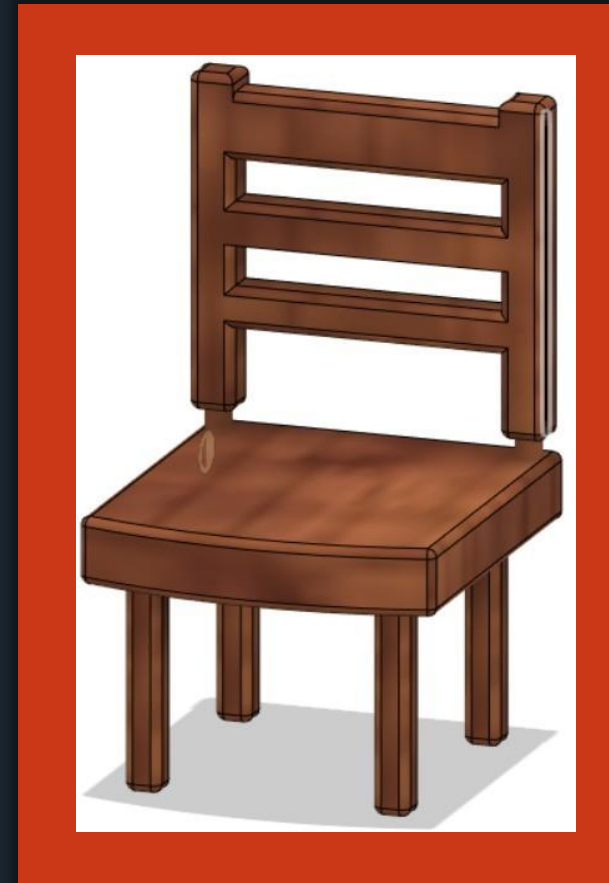

CIVIL PROTOYPING

What We've Done

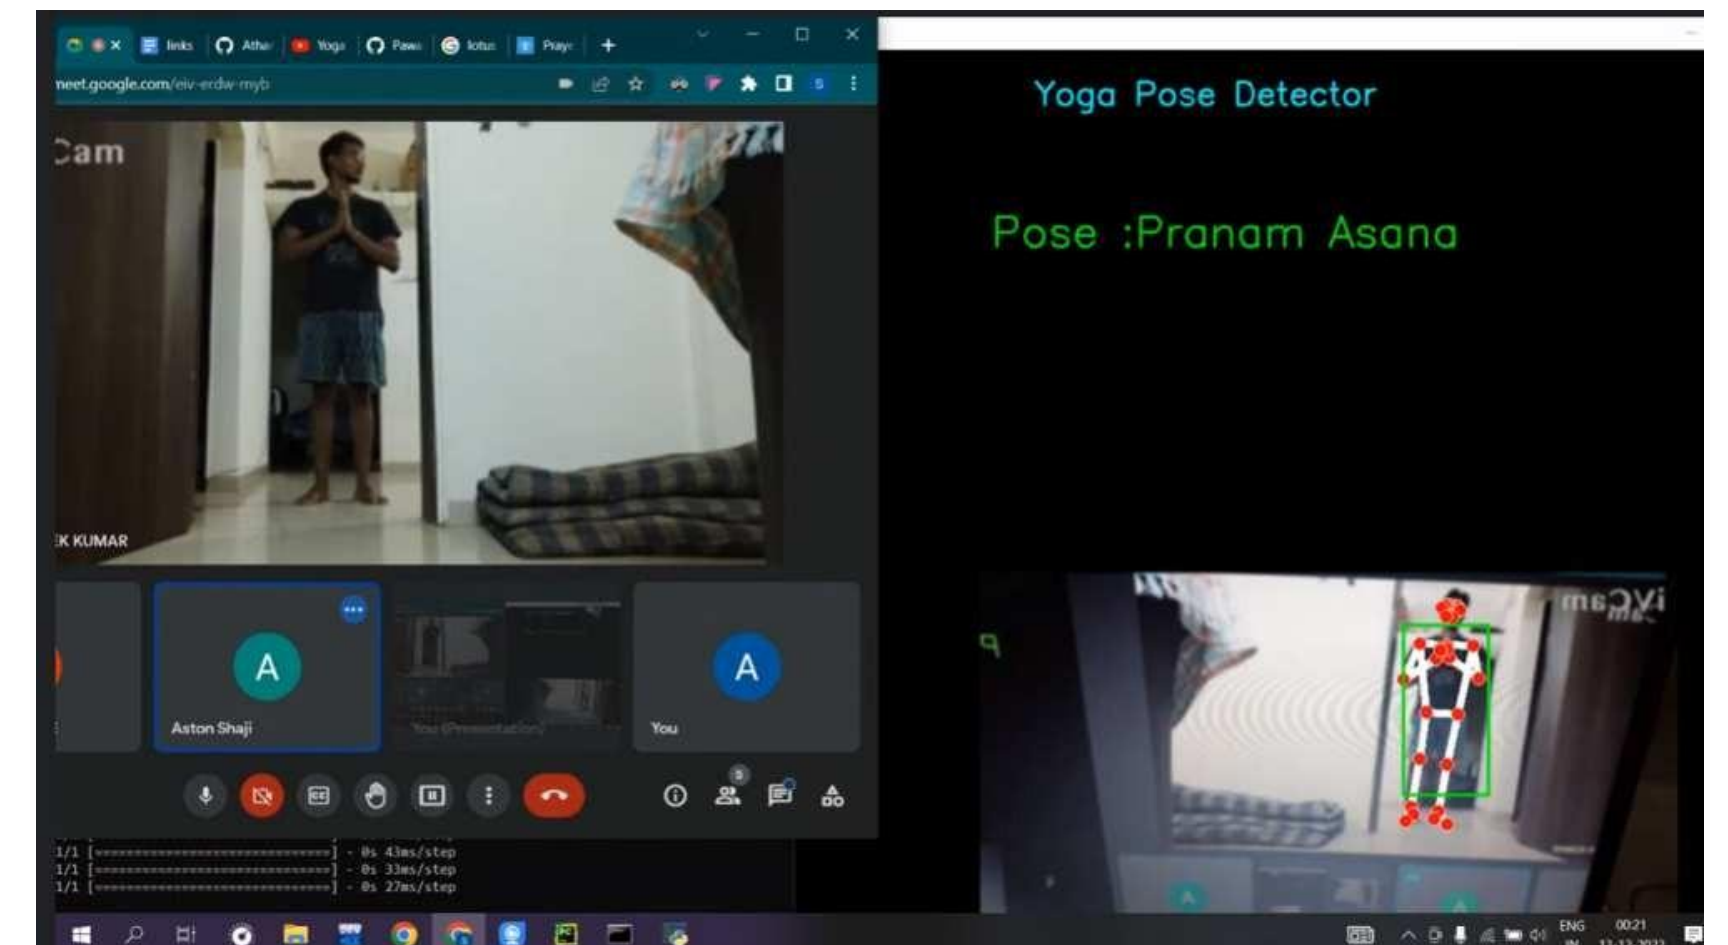

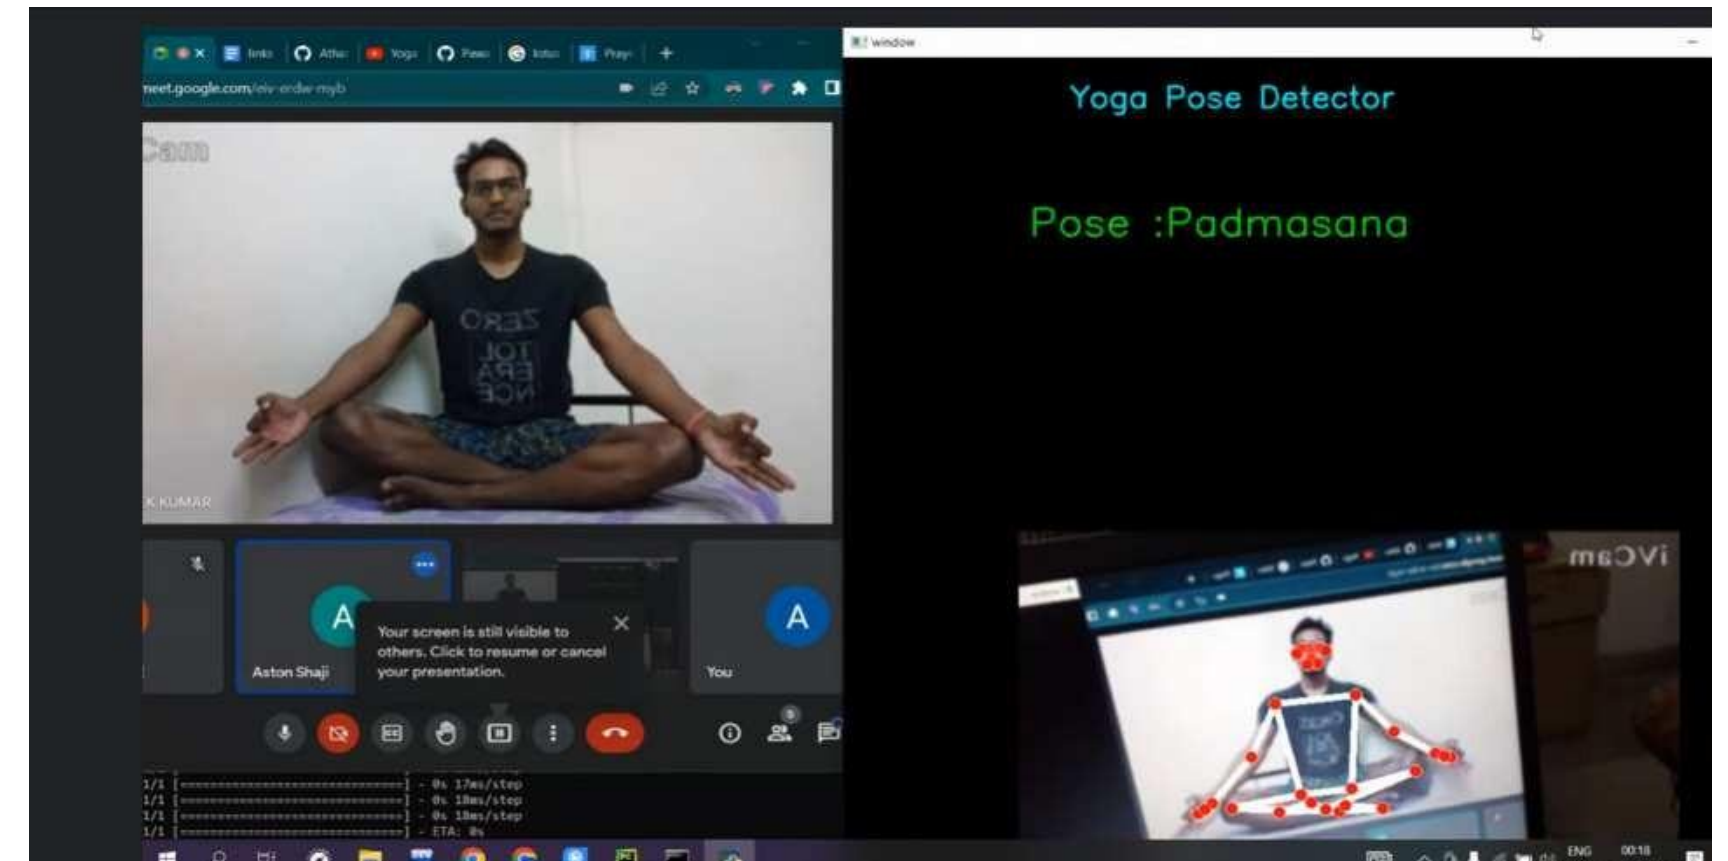

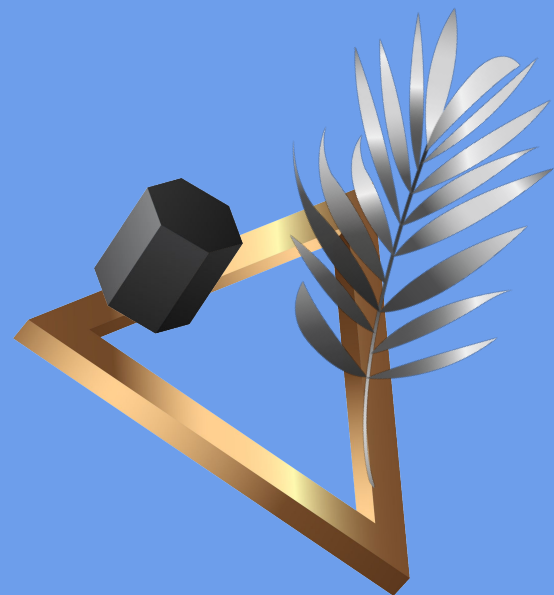

About Project

Ergonomic Chair - Built using Bamboo and Modeled in using Autocad 4 determining the various measurement required

COMPUTER VISION PROJECT

Yoga pose detector project
was used for determination
of the kind of pose that a
person was doing

ETT PROJECT

A door locking system using hydraulics is a unique and innovative approach to securing doors. This system utilizes the power of hydraulic pressure to provide robust and reliable door locking mechanisms.

In this setup, when the door needs to be locked, hydraulic pressure is applied to the locking mechanism, causing the door to securely latch into place. The pressure can be conveniently controlled by manual or automated means, ensuring ease of operation. When it's time to unlock the door, the hydraulic pressure is released, enabling the door to open smoothly.

INTERNSHIP

Supermonk
.STORE

Certificate of Internship

THIS CERTIFIES THAT

ABHISHEK KUMAR

has completed 1 Month Data Entry Internship during
the period 26/05/2021 to 26/06/2021 with
We5 Mobility Solution Pvt. Ltd.

Sudhanshu Kumar
DIRECTOR

WE5 MOBILITY SOLUTION PVT.LTD

FRONT-END WEB DEVELOPMENT

VIEH GROUP

**DESIGNED SEVERAL PROJECTS RELATED
TO IMAGE STREGANOGRAPHY**

VIEH GROUP

VIEH Private Limited

Sagar City Society, Andheri West, Mumbai, Maharashtra-400058

CERTIFICATE OF INTERNSHIP

Date: July 23, 2022

TO WHOM IT MAY CONCERN

This is to certify that Mr **Abhishek Kumar** has successfully completed the 30 days (One Month) internship program with VIEH PRIVATE LIMITED. He has worked on a project titled **Image Encryption** where he has showcased his excellent skills and knowledge.

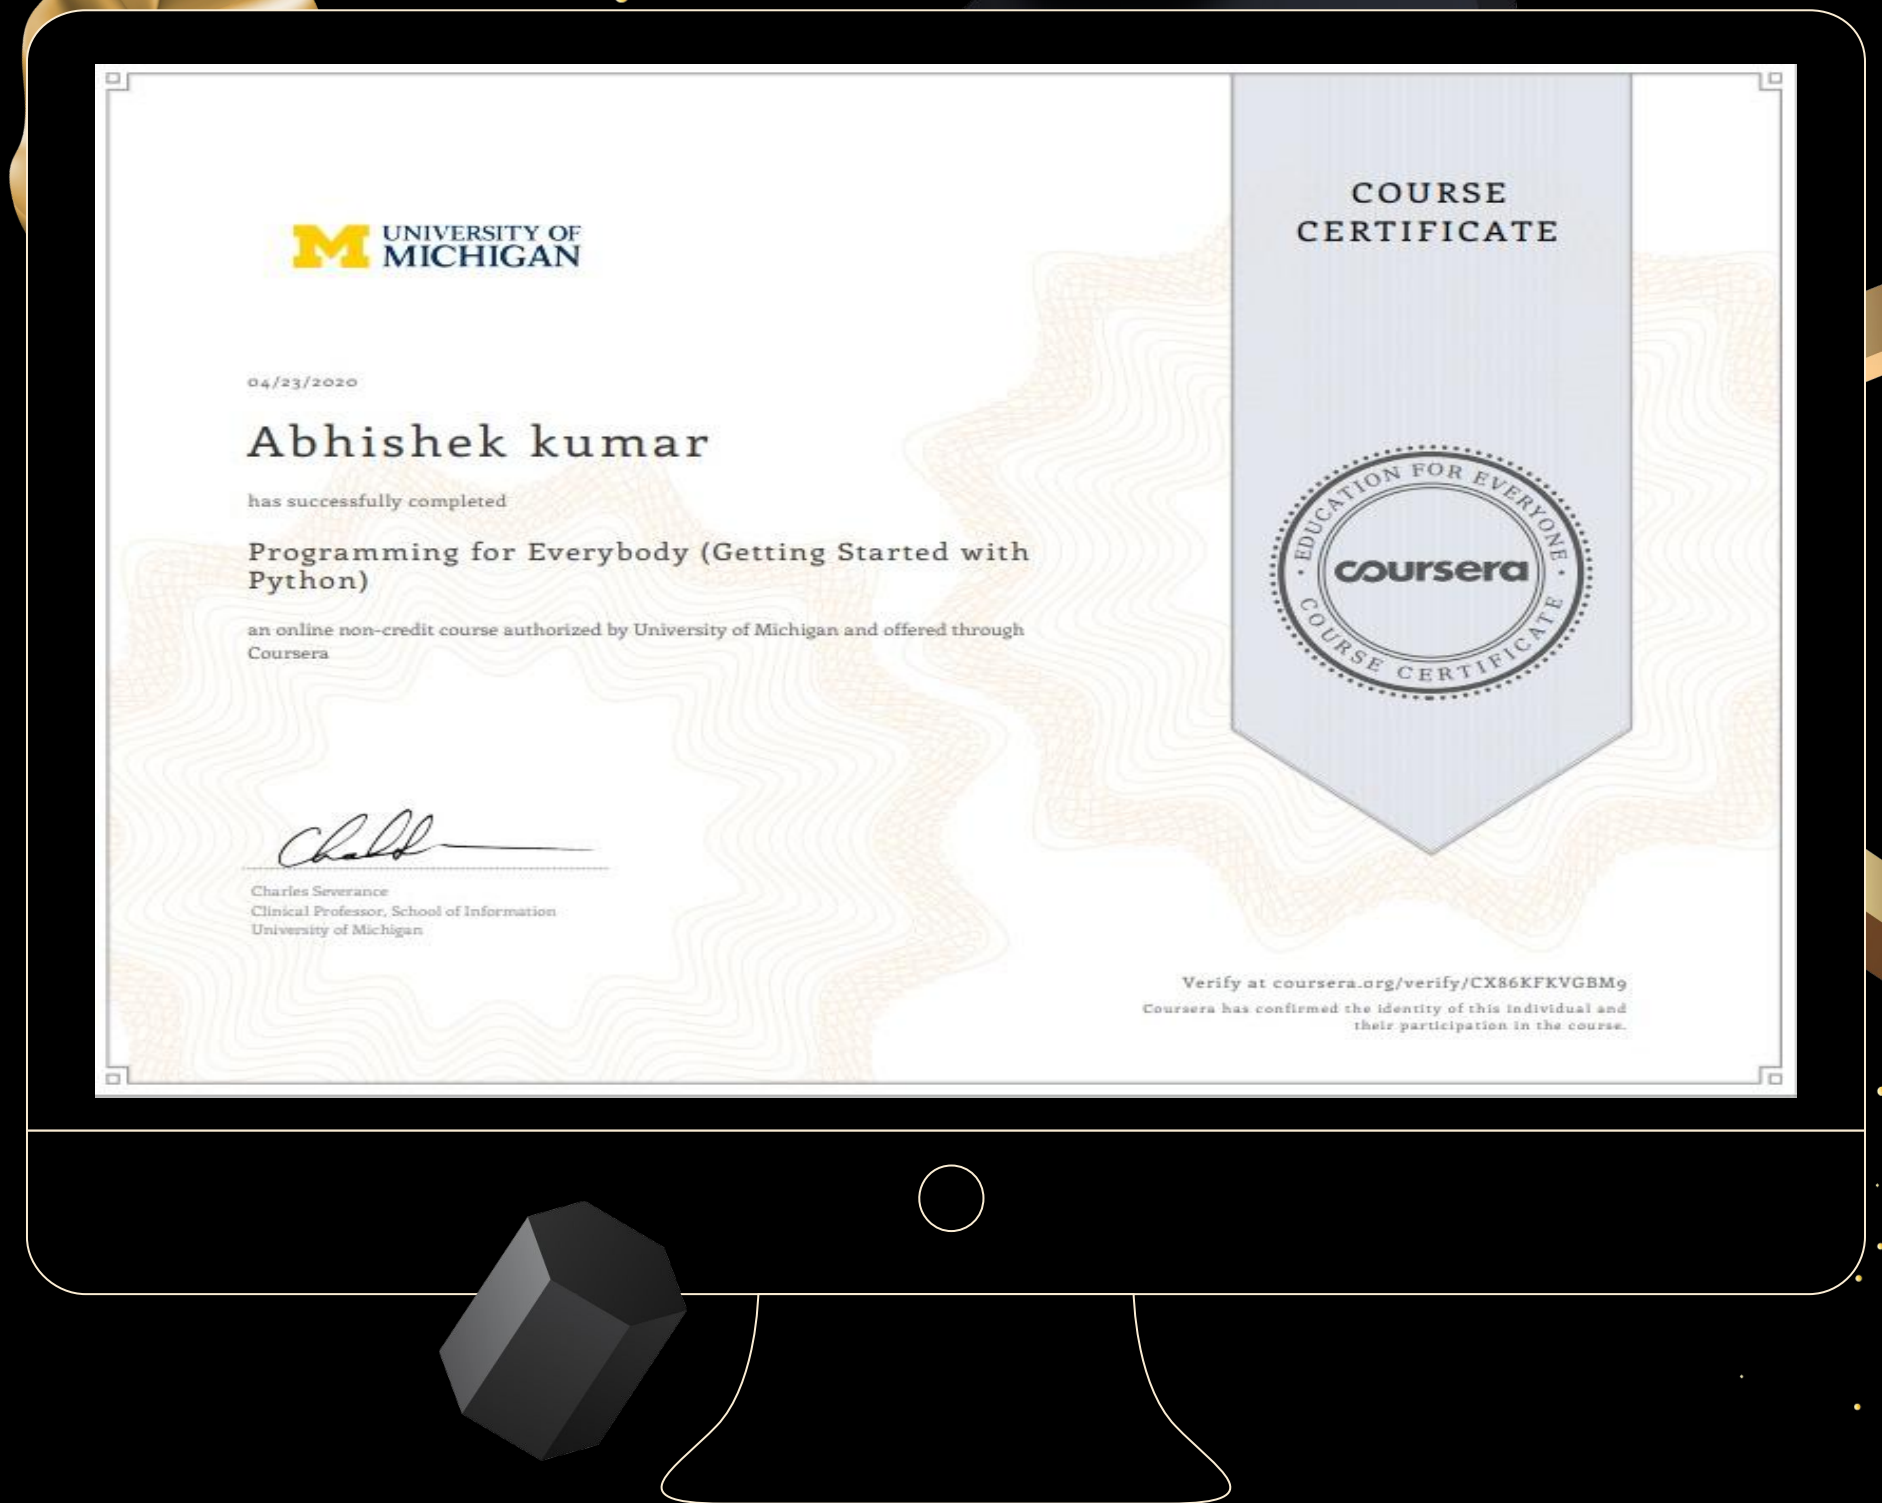

During his internship program with us, he demonstrated exceptional skills with a self-motivated attitude to learn new things and implemented them end to end with all of our mentioned industrial standards.

His performance was excellent and was able to complete the project successfully on time. We wish

him all the best for his future endeavors.

CERTIFICATE

PYTHON FOR
EVERYBODY ,FROM
UNIVERSITY OF
MICHIGAN

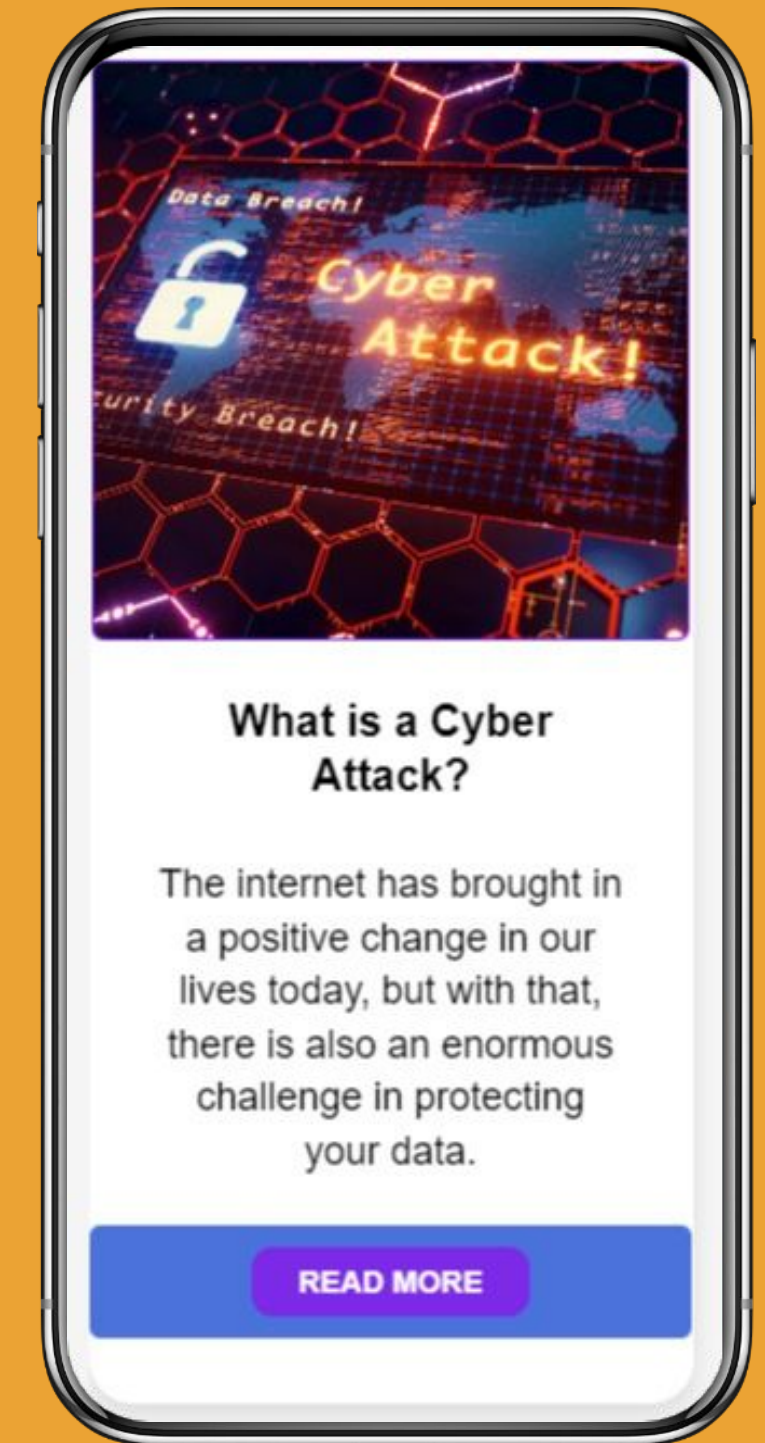

CERTIFICATE

**AWS CERTIFICATION -
AWS ACADEMY OF
GRADUATE - AWS
CLOUD ARCHITECTING**

THANK YOU

Dear college teacher and dear friend, your guidance, belief, and support have shaped me into the graduate I am today. Thank you for imparting knowledge and being a constant source of strength and friendship throughout this journey. Your impact on my education and personal growth is immeasurable, and I will forever cherish the memories we've created.
